

Bálint Balázs

Software Architect

Profile

Dedicated and versatile professional with a Bachelor's degree in Computer Science and a rich background in software development and architecture. With a solid foundation established as a C++ developer at NNG, I seamlessly transitioned into the dynamic realm of full-stack development in 2020. Currently serving as a Software Architect, I lead a team of eight developers, steering projects from inception to fruition with a blend of technical expertise and strategic vision.

Work Experience

2021 – Present NNG LLC | Budapest Software Architect

Responsibilities:

- Coordinated the daily activities of a team of **8+ developers**.
- Cultivated and maintained **strong relationships with stakeholders** to ensure alignment with business objectives.
- Led the **refinement, breakdown, and planning** of features.
- Supervised the development process through **code reviews** and **active support** to ensure code quality and adherence to deadlines.
- Served as the primary **technical** point of **contact** for the product and management team.
- Prepared and conducted technical **interviews**.
- Provided **mentorship and training** to team members to foster continuous improvement.

Achievements:

- Developed an EV-first navigation system reference product, customizable and embeddable for multiple clients.
- Delivered a customized version of this navigation system to a Chinese company manufacturing luxury electric vehicles.

2020 – 2021 NNG LLC | Budapest Full-Stack Developer

Responsibilities:

- Developed the **layout, application code, and backend** for a complex navigation system.
- Integrated the navigation application into an **embedded** system.
- Provided **technical support to customers**, addressing and resolving issues effectively.
- Integrated **third-party libraries** into the application to expand functionality.
- Ensured high code quality by implementing **automated tests**.

2018 – 2020 NNG LLC | Budapest C++ Developer

Responsibilities:

- Developed and integrated a complex navigation system into an **embedded** platform.
- Conducted regular **training sessions and presentations** for developers to promote continuous skill development.
- **Researched** and implemented **new technologies** to optimize the development process.

Achievements:

- Successfully delivered a sophisticated embedded navigation system for deployment in millions of units.
